

Senior .NET Developer – Job Description

Role Overview

We are looking for a **Senior .NET Developer** with strong experience in **end-to-end application development**, capable of designing, building, and maintaining scalable, high-performance applications. The ideal candidate has deep expertise in the **.NET ecosystem**, strong architectural thinking, and hands-on experience delivering production-grade systems.

Key Responsibilities

- Design, develop, and maintain **robust, scalable, and secure applications** using .NET technologies
 - Lead **full application development lifecycle** (requirement analysis → design → development → testing → deployment)
 - Build and optimize **RESTful APIs and microservices architectures**
 - Collaborate with frontend teams (React/Angular) to integrate APIs
 - Write clean, maintainable, and well-documented code following best practices
 - Perform **code reviews** and mentor junior developers
 - Troubleshoot and resolve **performance, scalability, and reliability issues**
 - Work closely with DevOps teams for **CI/CD pipelines and deployments**
 - Ensure application security, data protection, and compliance standards
 - Participate in **architecture and design discussions**
-

Required Skills & Qualifications

Technical Skills

- Strong experience with:
 - **C# and .NET Core / .NET 6+**
 - **ASP.NET Core (Web API, MVC)**

- Solid understanding of:
 - **Object-Oriented Programming (OOP)**
 - **Design Patterns (SOLID, Repository, Unit of Work)**
 - Experience with:
 - **Entity Framework / Dapper**
 - **SQL Server / PostgreSQL**
 - Hands-on experience in:
 - **Building RESTful APIs**
 - **Microservices architecture**
 - Familiarity with:
 - **Authentication & Authorization (JWT, OAuth)**
 - **Caching (Redis)**
 - Experience with:
 - **Cloud platforms (AWS / Azure)**
 - **Docker & containerization**
-

Application Development Expertise (Core Focus)

- Proven experience in building **enterprise-grade applications**
 - Strong knowledge of:
 - Application architecture (Layered, Clean Architecture, CQRS)
 - Scalability and performance optimization
 - Experience handling:
 - High-traffic systems
 - Real-time data processing (if applicable)
 - Ability to convert business requirements into **technical solutions**
-

Preferred Qualifications

- Experience with **frontend frameworks** (React, Angular)
- Knowledge of **message brokers** (RabbitMQ, Kafka)
- Experience in **CI/CD pipelines** (GitHub Actions, Azure DevOps, Jenkins)

- Familiarity with **unit testing frameworks** (xUnit, NUnit)
 - Agile/Scrum experience
-

Soft Skills

- Strong **problem-solving and analytical skills**
 - Excellent **communication and collaboration abilities**
 - Ability to **lead and mentor** a development team
 - Ownership mindset and attention to detail
-

Experience

- 5+ years of experience in **.NET development**
 - 2+ years in a **senior or lead role**
 - Proven track record of delivering **production-ready applications**
-

Nice to Have

- Experience in **domain-driven design (DDD)**
 - Exposure to **event-driven architecture**
 - Experience working in **distributed systems**
-

What We Offer

- Competitive salary
- Flexible work environment
- Opportunity to work on **scalable, real-world applications**
- Career growth and leadership opportunities
